Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Principle of the methods of measurements 5

5 Selection and demarcation of site 6
5.1 Selection of site 6
5.2 Demarcation of site 7

6 Measurement of cross-sectional area 7
6.1 General 7
6.2 Measurement of width 7
6.3 Measurement of depth 8

7 Measurement of velocity 9
7.1 Measurement of velocity using current-meters 9
7.1.1 Rotating-element current-meters 9
7.1.2 Electromagnetic current-meters 9
7.1.3 Measurement procedure 9
7.1.4 Oblique flow 10
7.1.5 Determination of the mean velocity in a vertical 11
7.1.6 Errors and limitations 14
7.2 Measurement of velocity using floats 15
7.2.1 General 15
7.2.2 Selection of site 15
7.2.3 Measuring procedure 15
7.2.4 Types of float 15
7.2.5 Determination of velocity 16
7.2.6 Main sources of error 17

8 Computation of discharge 17
8.1 General 17
8.2 Graphical method 17
8.2.1 Depth-velocity-integration 17
8.2.2 Velocity-area Integration method (velocity-contour method) 18
8.3 Arithmetic methods 20
8.3.1 Mean-section method 20
8.3.2 Mid-section method 20
8.4 Independent vertical method 21
8.5 Mean-section method -- Horizontal planes 24
8.6 Determination of discharge from surface-float velocity measurements 24
8.7 Determination of discharge for variations of water level 26
8.7.1 General 26
8.7.2 Computation of discharge 26
8.7.3 Computation of mean water level 26

9 Uncertainties in flow measurement 27
9.1 General 27
9.2 Definition of uncertainty 27
9.3 Method of calculating the uncertainty in discharge by measurement of velocity by current- meter 28
9.3.1 General 28
9.3.2 Contributory uncertainties 28
9.3.3 Example 30
9.3.4 Combined uncertainty 30
9.4 Method of calculating the uncertainty in discharge by measurement of velocity using floats 31
9.4.1 General 31
9.4.2 Contributory uncertainties 31
9.4.3 Combined uncertainty in discharge 32
9.4.4 Example 32

Annex A (informative) Correction for sag, pull, slope and temperature in measurement of cross-section width by tape or wire 34

Annex B (informative) Distance measurement across the cross-section 37

Annex C (informative) Corrections for wetted length of wire when measuring depths with wire not normal to surface 40

Annex D (informative) Correction for drift 43

Annex E (informative) Uncertainties in the velocity-area measurement 44

Annex F (informative) Determination of mean velocity from float measurements 48
