Water quality - Guidance on marine biological surveys of hard-substrate communities

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 1

3 Quality and safety 3

4 Strategies and objectives for hard-substrate surveys 4

5 Sampling 8

6 Taxon identification and sample processing 11

Annex A (normative) Description of methods 13

Annex B (informative) Field recording form 17

Annex C (informative) Biological definition of the supralittoral, eulittoral and sublittoral zones 18

Annex D (informative) Basis for the choice of semi-quantitative surveys in a standard 19

Annex E (informative) Detailed method for calculating level of exposure 20
