DIN EN 15012:2008-02 (E)

Plastics piping systems_- Soil and waste discharge systems within the building structure_-Performance characteristics for pipes, fittings and their joints

Co	ntents	Page
For	eword	3
ntroduction		4
1	Scope	5
2	Normative references	5
3	Terms, definitions and symbols	6
4	Performance requirements	6
4.1	Reaction to fire for applications inside building	6
4.2	Dimensional tolerances	6
4.3	Tightness (air and liquid)	6
4.4	Durability	7
4.5 gro	Maximum load for admissible deformation for pipes and fittings for applications buried in und within the building structure	7
4.6	Dangerous substances	8
5	Test methods	8
5.1	Reaction to fire for applications inside building	8
5.2	Dimensional tolerances	8
5.3	Tightness	8
5.4	Durability	8
5.5	Ring stiffness for applications buried in ground within the building structure	8
6	Evaluation of conformity	8
6.1	General	8
6.2	Initial type testing	9
6.3	Factory production control	10
6.4	One-off products and products produced in very low quantities	13
Annex A (normative) Mounting and fixing of components in the test apparatus according to EN 13823		14
	nex B (normative) Product standards for soil and waste discharge piping systems in plastics erials	16
	nex C (normative) Standards for assessment of conformity for soil and waste discharge piping tems in plastics materials) 17
	nex ZA (informative) Clauses of this European Standard addressing the provisions of the EU	
	estruction Products Directive	18
	1 Scope and relevant characteristics	18
	2 Procedure for attestation of conformity of plastics pipes and fittings	20
∠A.:	3 CE marking and labelling	23
3ibl	liography	27
