DIN EN 15972:2011-11 (E)

Water quality - Guidance on quantitative and qualitative investigations of marine phytoplankton

Contents

Page

Foreword 4

Introduction 5

1 Scope 5

2 Normative references 6

3 Terms and definitions 6

4 Aim and strategy for sampling phytoplankton 7
4.1 Sampling programme 7
4.2 Types of surveys 7
4.3 Sampling stations 8
4.4 Sampling depth 9
4.5 Sampling frequency and duration 10
4.6 Parallel water samples 10

5 Equipment 10
5.1 Equipment for quantitative sampling 10
5.2 Equipment for qualitative sampling 10
5.3 Sample bottles 11
5.4 Fixatives and preservatives 11

6 Survey procedures 12
6.1 Description of procedures 12
6.2 Preparation 12
6.3 Defining the position of sampling stations 12
6.4 Operating the sampling device 12
6.5 Sample fixation 13
6.6 Samples for analysis of living material 13
6.7 Sample labelling and recording of additional information 13
6.8 Sample storage 14
6.9 Equipment maintenance 14
6.10 Requirements for personnel 14

7 Species identification and sample processing 14
7.1 Species identification 14
7.2 Methods for quantification 15
7.3 Methods for qualitative analysis 16
7.4 Determination of biomass 17
7.5 Qualification requirements for personnel responsible for identification 17
7.6 Literature 17
7.7 Reporting of result 17
7.8 Data storage 18

Annex A (informative) Sampling and sample depth 19

A.1 General 19
A.2 Sampling depth 19
A.3 Integrated samples 19

A.4 Combined samples 20

Annex B (informative) Water samplers 21

Annex C (informative) Plankton net samples 22

Annex D (informative) Preservatives 23

Annex E (informative) Counting chambers for quantification without concentration of the phytoplankton cells 25

E.1 Sedgwick - Rafter 25
E.2 Palmer - Maloney 25
E.3 Haemacytometre 25

Annex F (informative) Utermöhl method 26

Bibliography 27
