DIN EN 14154-1:2011-06 (E)

Water meters - Part 1: General requirements (includes Amendment A2:2011)

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Technical characteristics 12
4.1 Meter size and overall dimensions 12
4.1.1 Meter size 12
4.1.2 Dimensions of in-line meters 12
4.1.3 Dimensions of concentric meters 15
4.1.4 #Dimensions of cartridge meters$ 16
4.1.5 #Dimensions of exchangeable metrological units$ 16
4.2 #Meter end connections$ 23
4.2.1 Connections interfaces 23
4.2.2 Threaded end connections 23
4.2.3 Flanged connection 23
4.2.4 Connection for bolting in between flanges 24
4.2.5 Dimensions for manifold(s) for concentric meters 24
4.3 Indicating device 24
4.3.1 General requirements 24
4.3.2 Types of indicating device 26
4.3.3 Verification devices - First element - Verification scale interval 26
4.4 Water meters which utilise electronic devices 27
4.4.1 Checking facilities 27
4.4.2 Power supply 27
4.4.3 Correction device 29
4.4.4 Calculator 29
4.4.5 Ancillary device 29
4.5 Materials and construction 29
4.6 Protection against solid particles 30
4.7 Reverse flow 30
4.8 Meter security and protection against fraud 30
4.8.1 Mechanical protection devices 30
4.8.2 Electronic sealing devices 30

5 Meter classification 31
5.1 Meter pressure classes 31
5.1.1 Admissible water pressure 31
5.1.2 Internal pressure 31
5.1.3 Concentric meters 32
5.2 Meter temperature classes 32
5.3 Flow profile sensitivity classes 32
5.4 Pressure loss 33

6 Marking 34

7 Metrological characteristics 35
7.1 Permanent flowrate (Q3) 35
7.2 Measuring range 35

7.3 Relationship between permanent flowrate (Q3) and overload flowrate (Q4) 36
7.4 The relationship between transitional flowrate (Q2) and minimum flowrate (Q1) 36
7.5 Reference flowrate 36
7.6 Maximum permissible error 36
7.6.1 Sign of the error 36
7.6.2 Relative error, ... 36
7.6.3 MPE lower flow range 36
7.6.4 MPE upper flow range 37
7.6.5 Maximum permissible errors in service 37
7.6.6 Absence of flow 37
7.7 Meters with subassemblies 37

8 Meter performance requirements 38
8.1 Measurement error tests 38
8.2 #Interchange error tests$ 38
8.3 Pressure tests 38
8.4 Pressure loss tests 38
8.5 Overload temperature tests 38
8.6 Climatic and mechanical environment 38
8.7 Electromagnetic environment 39
8.8 Static magnetic field 39
8.9 Endurance 40

9 Metrological control 40
9.1 Pattern approval 40
9.1.1 Extent of pattern approval 40
9.1.2 Objective of pattern approval 40
9.1.3 Number of meters to be tested 41
9.1.4 Test verdict 41
9.2 Initial verification 41
9.2.1 General 41
9.2.2 Static pressure test 41
9.2.3 Error (of indication) measurements 41
9.2.4 Water temperature of tests 42

Annex A (normative) Checking facilities 43

A.1 Action of checking facilities 43
A.2 Checking facilities for the measurement transducer 43
A.2.1 Pulse input solutions 43
A.2.2 Other technologies 44
A.3 Checking facilities for the calculator 44
A.3.1 Checking of correct functioning 44
A.3.2 Checking of the validity of calculations 45
A.4 Checking facility for the indicating device 45
A.4.1 First possibility 45
A.4.2 Second possibility 46
A.5 Checking facilities for ancillary devices 46
A.6 Checking facilities for the associated measuring instruments 46

Annex B (normative) In-line meter dimensions (including alternative lengths) 47

Annex C (informative) Table of rated operating, limiting and references conditions 50

Annex D (informative) Test program 52

Annex ZA (informative) !Relationship between this European Standard and the Essential Requirements of EU Directive 22/2004/EC on Measuring Instruments" 53
