DIN EN 1717:2011-08 (E)

Protection against pollution of potable water installations and general req uirements of devices to prevent pollution by backflow

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Pollution of potable water : general observations 7
4.1 Backflow of used water 7
4.2 Connection 7
4.3 External influences 8
4.4 Materials 8
4.5 Stagnation 8
4.6 Harm caused by inadequate or improper maintenance 8

5 Analysis method of the risks at the point of use and choice of protection 8
5.1 General remarks 8
5.2 Determination of fluid categories which are or could be in contact with potable water 9
5.3 Determination of the installation characteristics 10
5.4 Separation by single or double walls 10
5.5 Air break to drain 11
5.6 Installation matrix 11
5.7 Protection units 11
5.8 Matrix of the protection units appropriate to fluid categories 13

6 Point of use protection for equipment at the draw-off point for domestic uses 15
6.1 Choice of the protection units to be implemented 15
6.2 Location of the protection units 15

7 Point of use protection of particular equipment for non domestic uses 15

8 Protection at the connection point to the public potable water system 15

9 Air break to drain 15

Annex A (normative) Reference list of the protection units 17

Annex B (informative) Guide table for determining the fluid category from which protection is required 48

Annex C (informative) Summary of the analysis method 50
