

# DIN EN 1717:2011-08 (E)

## Protection against pollution of potable water installations and general requirements of devices to prevent pollution by backflow

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	5
4	Pollution of potable water : general observations .....	7
4.1	Backflow of used water .....	7
4.2	Connection .....	7
4.3	External influences .....	8
4.4	Materials .....	8
4.5	Stagnation .....	8
4.6	Harm caused by inadequate or improper maintenance .....	8
5	Analysis method of the risks at the point of use and choice of protection .....	8
5.1	General remarks .....	8
5.2	Determination of fluid categories which are or could be in contact with potable water .....	9
5.3	Determination of the installation characteristics .....	10
5.4	Separation by single or double walls .....	10
5.5	Air break to drain .....	11
5.6	Installation matrix .....	11
5.7	Protection units .....	11
5.8	Matrix of the protection units appropriate to fluid categories .....	13
6	Point of use protection for equipment at the draw-off point for domestic uses .....	15
6.1	Choice of the protection units to be implemented .....	15
6.2	Location of the protection units .....	15
7	Point of use protection of particular equipment for non domestic uses .....	15
8	Protection at the connection point to the public potable water system .....	15
9	Air break to drain .....	15
Annex A (normative) Reference list of the protection units .....		17
Annex B (informative) Guide table for determining the fluid category from which protection is required .....		48
Annex C (informative) Summary of the analysis method .....		50
Bibliography .....		51
