Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Principle 8

5 Materials 8
5.1 Test plants 8
5.2 Soil and soil storage 8
5.2.1 General 8
5.2.2 Test soil 9
5.2.3 Control soil 9
5.3 Reference substance 10

6 Apparatus 10

7 Methods 12
7.1 Experimental design 12
7.2 Pre-test 12
7.3 Preliminary test (range-finding) 12
7.4 Final test 13
7.5 Preparation of the pots 13
7.6 Preparation of the seeds 13
7.7 Growth conditions 13
7.8 Start of the test 14
7.9 Handling during the test 14
7.9.1 Number of plants and thinning out 14
7.9.2 Watering 14
7.9.3 Rearrangement of test vessels 14
7.9.4 Pollination 14
7.9.5 Reporting 15
7.10 Endpoint measurements 15
7.10.1 Seedling emergence 15
7.10.2 Harvest at day 14 15
7.10.3 Final harvest 15
7.11 Summary and timetable of the test 16

8 Validity criteria 17

9 Assessment of the results 17
9.1 Presentation of measured data 17
9.2 Statistical analysis 18
9.2.1 Preliminary test 18
9.2.2 Final test 18
9.2.3 NOEC (no observed effect concentration) approach 18
9.2.4 ECx (effect concentration) approach 18

10 Test report 19

Annex A (informative) Testing of chemicals in soil 20

Bibliography 21
