

DIN EN ISO 22030:2011-09 (E)

Soil quality - Biological methods - Chronic toxicity in higher plants (ISO 22030:2005)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Principle	8
5	Materials	8
5.1	Test plants	8
5.2	Soil and soil storage	8
5.2.1	General	8
5.2.2	Test soil	9
5.2.3	Control soil	9
5.3	Reference substance	10
6	Apparatus	10
7	Methods	12
7.1	Experimental design	12
7.2	Pre-test	12
7.3	Preliminary test (range-finding)	12
7.4	Final test	13
7.5	Preparation of the pots	13
7.6	Preparation of the seeds	13
7.7	Growth conditions	13
7.8	Start of the test	14
7.9	Handling during the test	14
7.9.1	Number of plants and thinning out	14
7.9.2	Watering	14
7.9.3	Rearrangement of test vessels	14
7.9.4	Pollination	14
7.9.5	Reporting	15
7.10	Endpoint measurements	15
7.10.1	Seedling emergence	15
7.10.2	Harvest at day 14	15
7.10.3	Final harvest	15
7.11	Summary and timetable of the test	16
8	Validity criteria	17
9	Assessment of the results	17
9.1	Presentation of measured data	17
9.2	Statistical analysis	18
9.2.1	Preliminary test	18
9.2.2	Final test	18
9.2.3	NOEC (no observed effect concentration) approach	18
9.2.4	ECx (effect concentration) approach	18

10	Test report	19
	Annex A (informative) Testing of chemicals in soil	20
	Bibliography	21
