ISO 11262:2011-11 (E)

Soil quality - Determination of total cyanide

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 2
4.1 Direct liberation of hydrogen cyanide using orthophosphoric acid 2
4.2 Determination of total cyanide content 2

5 Reagents 2
5.1 Reagents for liberation and absorption of cyanide 2
5.2 Reagents for the photometric determination of cyanide 3
5.3 Reagents for the titrimetric determination of cyanide 3

6 Apparatus 4

7 Sample preservation and preparation 5
7.1 Sample preservation 5
7.2 Sample preparation 5

8 Direct liberation using orthophosphoric acid 6
8.1 Procedure 6
8.2 Blank test 6

9 Determination of cyanide -- Photometric method 7
9.1 Applicability 7
9.2 Procedure 7
9.3 Preparation of the calibration graph 7
9.4 Calculation 7

10 Determination of cyanide -- Titrimetric method using an indicator 8
10.1 Applicability 8
10.2 Procedure 8
10.3 Calculation 9

11 Expression of results 9

12 Precision 10

13 Test report 10

Annex A (informative) Precision data 11

Annex B (informative) Extraction with sodium hydroxide solution and subsequent liberation using orthophosphoric acid 12

Annex C (informative) Comparison of the direct liberation of total cyanide and sodium hydroxide extraction with subsequent liberation 15
