

ISO 11262:2011-11 (E)

Soil quality - Determination of total cyanide

	Contents	Page
Foreword	iv	
Introduction	v	
1 Scope	1	
2 Normative references	1	
3 Terms and definitions	1	
4 Principle	2	
4.1 Direct liberation of hydrogen cyanide using orthophosphoric acid	2	
4.2 Determination of total cyanide content	2	
5 Reagents	2	
5.1 Reagents for liberation and absorption of cyanide	2	
5.2 Reagents for the photometric determination of cyanide	3	
5.3 Reagents for the titrimetric determination of cyanide	3	
6 Apparatus	4	
7 Sample preservation and preparation	5	
7.1 Sample preservation	5	
7.2 Sample preparation	5	
8 Direct liberation using orthophosphoric acid	6	
8.1 Procedure	6	
8.2 Blank test	6	
9 Determination of cyanide -- Photometric method	7	
9.1 Applicability	7	
9.2 Procedure	7	
9.3 Preparation of the calibration graph	7	
9.4 Calculation	7	
10 Determination of cyanide -- Titrimetric method using an indicator	8	
10.1 Applicability	8	
10.2 Procedure	8	
10.3 Calculation	9	
11 Expression of results	9	
12 Precision	10	
13 Test report	10	
Annex A (informative) Precision data	11	
Annex B (informative) Extraction with sodium hydroxide solution and subsequent liberation using orthophosphoric acid	12	

Annex C (informative) Comparison of the direct liberation of total cyanide and sodium hydroxide extraction with subsequent liberation	15
Bibliography	16
