Treatment of water of swimming pools and baths - Part 3: Combinations of process with ozonization

Contents		Page
Foreword		3
1	Scope	4
2	Normative references	4
3	Principle of the process combinations	5
3.1	Flocculation - filtration - ozonation - chlorination	5
3.2	Flocculation - ozonation - multi-layer filtration with sorption - chlorination	5
4	Process stages	6
4.1	Acid neutralizing capacity adjustment	6
4.1.1	General	6
4.1.2	Compounds used to adjust acid neutralizing capacity	6
4.1.3	Acid neutralizing capacity values	6
4.1.4	Checking the acid neutralizing capacity	6
4.2	pH value adjustment	6
4.3	Flocculation	6
4.3.1	General	6
4.3.2	Flocculants	7
4.3.3	Minimum quantity of flocculant to be added	7
4.3.4	Checking the flocculant dosage	7
4.4	Ozonation	8
4.4.1	General	8
4.4.2	Ozone concentration by mass	8
4.4.3	Ozone dosage	9
4.4.4	Testing the ozone plant	9
4.5	Flocculation filtration in the process combination flocculation - filtration - ozonation - sorption filtration - chlorination	9
4.5.1	General	9
4.5.3	Testing the filtration	12
4.6	Sorption filtration in the process combination flocculation - filtration - ozonation - sorption filtration - chlorination	12
4.6.1	General	12
4.6.2	Particle size ranges, filter bed heights and filtration rates	13
4.6.3	Backwashing sorption filters	13
4.6.4	Testing the filtration	14
4.7	Multi-layer filtration in the process combination flocculation - ozonation - multi-layer filtration with sorption effect - chlorination	14
4.7.1	General	14
4.7.2	Particle size ranges, filter bed heights and filtration rates	14
4.7.3	Backwashing multi-layer filters with sorption effect	15
4.7.4	Testing the filtration	17
4.8	Testing the flocculation filtration and sorption filtration	17
4.9	Chlorination	18
4.9.1	General	18
4.9.2	Chlorine concentration	18
5	Load capacity factor, k	18
Annex A (informative)	Simplified representation of some process combinations (examples)	19
