ISO 14238:2012-08 (E)

Soil quality - Biological methods - Determination of nitrogen mineralization and nitrification in soils and the influence of chemicals on these processes

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 2

5 Materials 2
5.1 Soils 2
5.2 Reagents and materials 3
5.3 Test substance 3

6 Apparatus 4

7 Procedures 4
7.1 Experimental options 4
7.2 Treatment of soils 4
7.3 Incubation of soils 5
7.4 Sampling of soils for testing 6
7.5 Extraction of soils 6
7.6 Analyses 6

8 Expression of results 6
8.1 Basic mineralization test 6
8.2 Toxicity testing 7

9 Test report 8

Annex A (informative) Determination of water-holding capacity of soil 10
