Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Criteria for the selection of water meters 5
4.1 General considerations 5
4.2 Information to be provided by the manufacturer 5
4.3 Meters operating in parallel or in a group 5

5 Associated fittings 6
5.1 General 6
5.2 Upstream of the meter 6
5.3 Downstream of the meter 6

6 Installation 7
6.1 General requirements 7
6.2 Installation requirements 7
6.3 Water quality (suspended particles) 8
6.4 Electromagnetic meters 8
6.5 Meters operating in parallel or in a group 8
6.6 Security of operation 8

7 Hydraulic disturbances 8
7.1 General considerations 8
7.2 Methods to eliminate disturbances 9

8 First operation of new or repaired water meters 10
8.1 General considerations 10
8.2 Meters operating in parallel or in a group 10
8.3 Protection of the meter 10
8.4 Safety of personnel and users 12
8.5 Comfort of personnel -- Access to the water meter and fittings 13
