

ISO 13913:2014-02 (E)

Soil quality - Determination of selected phthalates using capillary gas chromatography with mass spectrometric detection (GC/ MS)

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Principle	2
4	Interferences	2
4.1	General	2
4.2	Interferences during sampling	2
4.3	Cross contamination	2
4.4	Interferences in gas chromatography	2
5	Reagents	2
5.1	General	2
6	Apparatus	4
6.1	General	4
7	Sampling and sample storage	6
8	Procedure	6
8.1	Preparation of glass apparatus	6
8.2	Drying of the sample	6
8.3	Extraction	7
8.4	Clean-up	7
8.5	Gas chromatography	8
8.6	Blank monitoring	8
8.7	Identification of individual compounds	8
9	Calibration	9
9.1	General	9
9.2	Calibration with internal standard	9
9.3	Verification of calibration	10
10	Calculation	11
11	Expression of results	12
12	Precision	12
13	Test report	12
Annex A (informative) Repeatability and reproducibility data		13
Annex B (informative) Example of a reference solution for multipoint calibration		16
Annex C (informative) Examples for gas chromatographic conditions		18

Annex D (informative) Flow scheme of the determination of phthalates	20
Bibliography	21
