DIN EN 15768:2015-05 (E)

Influence of materials on water intended for human consumption - GC-MS identification of water leachable organic subst ances

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Principle 9

5 Reagents 9
5.1 General 9
5.2 Required reagents 9

6 Apparatus 13

7 Storage of migration waters, procedural blanks and laboratory blanks 14

8 Method of analysis 14
8.1 Extraction procedure 14
8.2 GC-MS analysis 15
8.2.1 Safety precautions 15
8.2.2 Mass spectrometer operating parameters 15
8.2.3 Setting up the mass spectrometer and data system 15
8.2.4 Initial tuning and mass calibration of the mass spectrometer 15
8.3 Setting up the GC-MS system 15
8.4 GC-MS operating conditions for analysis of solvent extracts 16
8.5 Production of required outputs from the GC-MS data system 17

9 Quality assurance (QA) and quality control (QC) procedures 17
9.1 The mass calibration of the mass spectrometer 17
9.2 The performance of the GC-MS system 17
9.3 The performance of the method 17
9.4 Performance of the analyst 18
9.5 Uncertainty of the method 18

10 Expression of results 18
10.1 Semi-quantitative estimation of concentrations of substances detected 18
10.2 Identification of substances detected 19
10.3 Reporting of results 19

11 Test report 20
11.1 General 20
11.2 Test results 21

Annex A (normative) Additional procedural details 23

A.1 Checking suitability of apparatus used for concentrating solvent extracts 23
A.2 Procedure for calculation of recoveries of internal standards 23

A.3 Standard solutions for checking GC column performance 24

Annex B (informative) Outline of general approach for identification of substances detected 25

B.1 General approach - Introduction 25
B.2 GC-MS Test Solution 25
B.3 Typical Leachate 26
B.4 Identifying substances 26
B.5 Overloading 27

Annex C (informative) Guidance on the interpretation of results 28

C.1 Introduction 28
C.2 Initial assessment of test report 28
C.3 Assessment of results of analysis 28

Annex D (informative) Guidance on the identification of substances 30

D.1 A suggested strategy to assist in identifying substances in extracted leachates 30
D.2 Resolution of co-eluting peaks 30
D.3 Proceeding when background subtraction does not help 31
D.4 Tentatively identifying a substance using boiling points and retention indices 31
D.5 Library search results and identifying "unknown" substances 32
D.6 Interpretation of the mass spectrum 32
D.7 Reporting confidence in a substance identification 33
D.8 How to report alternative identifications and when this is appropriate 33
D.9 What to do if library search fails to assign a reasonable identification 34
