

DIN EN 15768:2015-05 (E)

Influence of materials on water intended for human consumption - GC-MS identification of water leachable organic substances

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Principle	9
5	Reagents	9
5.1	General	9
5.2	Required reagents	9
6	Apparatus	13
7	Storage of migration waters, procedural blanks and laboratory blanks	14
8	Method of analysis	14
8.1	Extraction procedure	14
8.2	GC-MS analysis	15
8.2.1	Safety precautions	15
8.2.2	Mass spectrometer operating parameters	15
8.2.3	Setting up the mass spectrometer and data system	15
8.2.4	Initial tuning and mass calibration of the mass spectrometer	15
8.3	Setting up the GC-MS system	15
8.4	GC-MS operating conditions for analysis of solvent extracts	16
8.5	Production of required outputs from the GC-MS data system	17
9	Quality assurance (QA) and quality control (QC) procedures	17
9.1	The mass calibration of the mass spectrometer	17
9.2	The performance of the GC-MS system	17
9.3	The performance of the method	17
9.4	Performance of the analyst	18
9.5	Uncertainty of the method	18
10	Expression of results	18
10.1	Semi-quantitative estimation of concentrations of substances detected	18
10.2	Identification of substances detected	19
10.3	Reporting of results	19
11	Test report	20
11.1	General	20
11.2	Test results	21
Annex A (normative)	Additional procedural details	23
A.1	Checking suitability of apparatus used for concentrating solvent extracts	23
A.2	Procedure for calculation of recoveries of internal standards	23

A.3	Standard solutions for checking GC column performance	24
Annex B (informative) Outline of general approach for identification of substances detected		25
B.1	General approach - Introduction	25
B.2	GC-MS Test Solution	25
B.3	Typical Leachate	26
B.4	Identifying substances	26
B.5	Overloading	27
Annex C (informative) Guidance on the interpretation of results		28
C.1	Introduction	28
C.2	Initial assessment of test report	28
C.3	Assessment of results of analysis	28
Annex D (informative) Guidance on the identification of substances		30
D.1	A suggested strategy to assist in identifying substances in extracted leachates	30
D.2	Resolution of co-eluting peaks	30
D.3	Proceeding when background subtraction does not help	31
D.4	Tentatively identifying a substance using boiling points and retention indices	31
D.5	Library search results and identifying "unknown" substances	32
D.6	Interpretation of the mass spectrum	32
D.7	Reporting confidence in a substance identification	33
D.8	How to report alternative identifications and when this is appropriate	33
D.9	What to do if library search fails to assign a reasonable identification	34
