## Hydrometry - Suspended sediment in streams and canals - Determination of concentration by surrogate techniques

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Measuring principles .....	2
4.1	Transmission .....	2
4.2	Scattering .....	2
4.3	Transmission -- Scattering .....	3
4.4	Diffraction .....	3
5	Properties of sediment of importance for sediment surrogate techniques .....	3
5.1	General .....	3
5.2	Particle size .....	4
5.3	Particle colour .....	4
6	Methods for determination of suspended sediment concentration by surrogate techniques .....	4
6.1	General .....	4
6.2	Bulk optics .....	4
6.3	Laser diffraction (LD) .....	5
6.4	Acoustic back scatter (ABS) .....	5
7	Calibration and validation .....	6
Annex A (informative)	Determination of the concentration of suspended sediment by optical techniques .....	9
Annex B (informative)	Determination of the concentration of suspended sediment by laser diffraction technique .....	12
Annex C (informative)	Determination of the concentration of suspended sediment by acoustic back scatter .....	14
Bibliography .....		18
