Foreword 4

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 Principle 10

5 Reagents 10

6 Equipment 11

7 Sample preparation 12
7.1 General 12
7.2 Preparation of the test portion 12
7.3 Determination of the geometric surface area 12

8 Procedure 13
8.1 Testing conditions 13
8.2 Step 1 of the leaching procedure 13
8.3 Steps 2 - 8 of the leaching procedure 13
8.4 Weight loss of the monolithic waste during the test 14
8.5 Further preparation of the eluates for analysis 14
8.6 Blank test 15

9 Calculations 15
9.1 Expression of results 15
9.1.1 General 15
9.1.2 Expression of results in terms of area related release 16
9.1.3 Expression of results in concentrations 17
9.1.4 Calculation of release mechanism 17

10 Performance characteristics 17

11 Documentation and test report 18
11.1 General 18
11.2 General data 18
11.3 Leaching test conditions 18
11.4 Analytical report 18
11.5 Results of the leaching test 19

Annex A (informative) Identification of release mechanisms and use of test results 20

A.1 Introduction 20
A.2 Examples of factors influencing the leaching of monolithic waste 20

A.3 Long term release prediction 22

Annex B (informative) Assessment of release mechanisms (if required) 23

B.1 Overview of release mechanisms 23
B.2 Procedure of identification of release mechanisms 24
B.3 Concentrations close to the limit of quantification 25
B.3.1 Overall low concentrations 25
B.3.2 Surface wash-off followed by low concentrations 26
B.4 Diffusion controlled release of a substance 26
B.4.1 Identification of diffusion controlled release 26
B.4.2 Surface wash-off preceding diffusion-controlled release 28
B.4.3 Diffusion-controlled release followed by depletion 28
B.4.4 Surface wash-off preceding diffusion-controlled release followed by depletion 28
B.5 Dissolution controlled release of a substance 28
B.6 Other release mechanism 29
B.6.1 Unidentified release mechanism 29
B.6.2 Surface wash-off of a substance 29
B.6.3 Depletion of a substance 30
B.6.4 Surface wash-off and depletion 31
B.7 Calculation of release 31
B.7.1 Area release 31
B.7.2 Surface wash-off 31
B.7.3 Release in the case of dissolution 31
B.7.4 Extrapolation of the cumulative area release for larger time values 31
B.8 Examples 32

Annex C (informative) Examples of data about the L/A ratio 51

Annex E (informative) Repeatability and reproducibility data 54

E.1 Material used in the interlaboratory comparison study 54
E.2 Interlaboratory comparison results 54
