

# DIN EN 15863:2015-06 (E)

## Characterization of waste - Leaching behaviour test for basic characterization - Dynamic monolithic leaching test with periodic leachant renewal, under fixed conditions

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	7
2	Normative references .....	7
3	Terms and definitions .....	8
4	Principle .....	10
5	Reagents .....	10
6	Equipment .....	11
7	Sample preparation .....	12
7.1	General .....	12
7.2	Preparation of the test portion .....	12
7.3	Determination of the geometric surface area .....	12
8	Procedure .....	13
8.1	Testing conditions .....	13
8.2	Step 1 of the leaching procedure .....	13
8.3	Steps 2 - 8 of the leaching procedure .....	13
8.4	Weight loss of the monolithic waste during the test .....	14
8.5	Further preparation of the eluates for analysis .....	14
8.6	Blank test .....	15
9	Calculations .....	15
9.1	Expression of results .....	15
9.1.1	General .....	15
9.1.2	Expression of results in terms of area related release .....	16
9.1.3	Expression of results in concentrations .....	17
9.1.4	Calculation of release mechanism .....	17
10	Performance characteristics .....	17
11	Documentation and test report .....	18
11.1	General .....	18
11.2	General data .....	18
11.3	Leaching test conditions .....	18
11.4	Analytical report .....	18
11.5	Results of the leaching test .....	19
Annex A (informative)	Identification of release mechanisms and use of test results .....	20
A.1	Introduction .....	20
A.2	Examples of factors influencing the leaching of monolithic waste .....	20

A.3	Long term release prediction .....	22
Annex B (informative) Assessment of release mechanisms (if required) .....		23
B.1	Overview of release mechanisms .....	23
B.2	Procedure of identification of release mechanisms .....	24
B.3	Concentrations close to the limit of quantification .....	25
B.3.1	Overall low concentrations .....	25
B.3.2	Surface wash-off followed by low concentrations .....	26
B.4	Diffusion controlled release of a substance .....	26
B.4.1	Identification of diffusion controlled release .....	26
B.4.2	Surface wash-off preceding diffusion-controlled release .....	28
B.4.3	Diffusion-controlled release followed by depletion .....	28
B.4.4	Surface wash-off preceding diffusion-controlled release followed by depletion .....	28
B.5	Dissolution controlled release of a substance .....	28
B.6	Other release mechanism .....	29
B.6.1	Unidentified release mechanism .....	29
B.6.2	Surface wash-off of a substance .....	29
B.6.3	Depletion of a substance .....	30
B.6.4	Surface wash-off and depletion .....	31
B.7	Calculation of release .....	31
B.7.1	Area release .....	31
B.7.2	Surface wash-off .....	31
B.7.3	Release in the case of dissolution .....	31
B.7.4	Extrapolation of the cumulative area release for larger time values .....	31
B.8	Examples .....	32
Annex C (informative) Examples of data about the L/A ratio .....		51
Annex E (informative) Repeatability and reproducibility data .....		54
E.1	Material used in the interlaboratory comparison study .....	54
E.2	Interlaboratory comparison results .....	54
Bibliography .....		61
