ISO 17294-2:2016-07 (E)

Water quality - Application of inductively coupled plasma mass spectrometry (ICP-MS) - Part 2: Deter mination of selected elements including uranium isotopes

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Termsanddefinitions 3

4 Principle 3

5 Interferences 3
5.1 General 3
5.2 Spectral interferences 4
5.2.1 General 4
5.2.2 Isobaric elemental 4
5.2.3 Polyatomic interferences 6
5.3 Non-spectral interferences 6

6 Reagents 7

7 Apparatus 11

8 Sampling 12

9 Sample pre-treatment 12
9.1 Determination of the mass concentration of dissolved elements without digestion 12
9.2 Determination of the total mass concentration after digestion 12

10 Procedure 13
10.1 General 13
10.2 Calibration of the ICP-MS system 13
10.3 Measurement of the matrix solution for evaluation of the correction factors 14
10.4 Measurement of the samples 14

11 Calculation 14

12 Test report 15

Annex A (normative) Determination of the mass concentration of uranium isotopes 16

Annex B (informative) Description of the matrices of the samples used for the interlaboratory trial 26

Annex C (informative) Performance data 28
