European foreword 4

Foreword 5

Introduction 6

1 Scope 8

2 Normative references 8

3 Terms and definitions 8

4 General guidance regarding test design 12
4.1 General 12
4.2 Replicates 12
4.2.1 General 12
4.2.2 Lowest ineffective dilution (LID) 12
4.2.3 Hypothesis testing -- two-sample comparisons 13
4.2.4 Concentration and dilution response relationship 13

5 Evaluation 14
5.1 General 14
5.2 Statistical analysis 14

6 Sampling and transportation 14
6.1 General 14
6.2 Sampling equipment 15
6.2.1 General 15
6.2.2 Sample container 15
6.3 Filling status of sample containers 16
6.4 Sample identification and records 16
6.5 Sub-sampling 16
6.6 Transportation 17
6.7 Contamination during sampling 17
6.8 Sampling quality control techniques 17

7 Pre-treatment 18
7.1 General 18
7.2 Preservation and storage 18
7.3 Thawing 19
7.4 Homogenization 19
7.5 Separation of soluble and particulate matter 19
7.6 Preconcentration 20
7.6.1 General 20
7.6.2 Extraction methods 21
7.7 pH adjustment 21

8 Apparatus and equipment 21
8.1 Selection of apparatus 21
8.2 Cleaning of apparatus and equipment 22

9 Impairment of test performance ... 22
9.1 Problems and preventive measures for samples containing removable ingredients ... 22
9.1.1 General ... 22
9.1.2 Volatilization ... 23
9.1.3 Foaming ... 23
9.1.4 Adsorption ... 23
9.1.5 Precipitation/flocculation ... 23
9.1.6 Degradation ... 23
9.2 Problems and preventive measures concerning coloured and/or turbid samples ... 24

10 Preparation of stock solutions and test batches ... 24
10.1 Water-soluble substances ... 24
10.2 Poorly soluble substances ... 24
10.2.1 General ... 24
10.2.2 Testing in the water solubility range ... 24
10.2.3 Dispersions and emulsions ... 25
10.2.4 Special problems with mixtures of substances or technical products ... 25
10.2.5 Limit test ... 26

11 Quality assurance for biotesting ... 26
11.1 General ... 26
11.2 Quality assurance in the context of the investigation of environmental samples ... 26

12 Reporting ... 27

Bibliography ... 30
