## Soil quality - Sampling - Part 105: Packaging, transport, storage and preservation of samples

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Incorporation in the sampling plan .....	2
5	Preparing samples for consignment .....	2
5.1	General .....	2
5.2	Containers .....	2
5.3	Labels .....	4
5.4	Preservation of samples .....	4
5.5	Filling containers and preparing samples and containers for consignment and transport...4	4
5.6	Sealing and consignment .....	5
5.7	Preservation of samples .....	5
6	Preservation prior to transport .....	5
6.1	General requirements .....	5
6.2	Cooling and freezing .....	7
6.3	Airtight storage .....	7
6.4	Nitrogen atmosphere .....	7
6.5	Hazardous materials .....	8
7	Transport .....	8
7.1	General requirements .....	8
7.2	Special transportation requirements .....	8
7.2.1	Dry soils .....	8
7.2.2	Samples for biological testing .....	8
7.2.3	Samples for DNA or RNA analysis .....	8
7.2.4	Drill cores .....	8
7.2.5	Cut soil cylinders .....	8
7.2.6	Large volumes of soil .....	8
8	Delivery .....	9
