ISO 18400-204:2017-01 (E)

Soil quality - Sampling - Part 204: Guidance on sampling of soil gas

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 2

3 Termsanddefinitions 2

4 Preliminary items to be considered 5

5 Basic principles 6
5.1 Physical and chemical principles 6
5.1.1 Permanent gases 6
5.1.2 Volatile organic compounds 7
5.2 Environmental conditions 7
5.3 Soil gas dynamics 9
5.4 Identifying the source of soil gas 9

6 Requirements for sampling plan 10
6.1 General considerations for sampling plan 10
6.1.1 Objectives and general recommendations 10
6.1.2 Initial explorations (field screening) 12
6.1.3 Known contamination centre 12
6.1.4 Determination of the contamination hot spots (areas showing highest concentrations) and gas monitoring wells location 12
6.1.5 Determination of horizontal and vertical distribution of VOCs 13
6.1.6 Observation of spatial distribution of VOCs in the course of time 13
6.1.7 Evaluation of soil gases contribution to ambient, indoor and/or outdoor air 13
6.2 Working ranges of measurement methods 13
6.3 Monitoring well options 14
6.4 Sampling plan 17
6.4.1 Horizontal location of sampling devices 17
6.4.2 Monitoring depths 18
6.4.3 Timing and frequency of monitoring 19
6.4.4 Sample volumes and sampling rates 20

7 Construction of monitoring installations 21
7.1 General 21
7.1.1 Environmental conditions 21
7.1.2 Instruments 21
7.2 Soil gas sampling devices 21
7.2.1 Passive soil gas sampling 21
7.2.2 Sub-slab 22
7.2.3 Driven probes 22
7.2.4 Gas-monitoring standpipe in a borehole 23

8 Sampling 26
8.1 Generic consideration 26
8.2 Preparation of the monitoring installations 29
8.2.1 Preparation of the sampling point 29

8.2.2 Leakage test ... 29
8.2.3 Purge ... 29
8.3 Active sampling ... 30
8.3.1 General ... 30
8.3.2 Sorbent tubes or filters ... 31
8.3.3 Sample containers -- Sampling bags ... 34
8.3.4 Sparging ... 35
8.3.5 Sample containers -- Pressurized containers ... 35

8.4 Passive sampling ... 35
8.5 Sampling for on-site measurements ... 36

9 Identification,packagingandtransportofsamplesforlaboratoryanalysis ... 37
9.1 Identification ... 37
9.2 Packaging and transport ... 37

10 Sampling report ... 37

11 Quality assurance ... 38
11.1 General ... 38
11.2 Quality control samples ... 39
11.2.1 General ... 39
11.2.2 Blind replicate samples ... 40
11.2.3 Split samples ... 40
11.2.4 Trip blanks ... 40
11.2.5 Field blanks ... 40
11.2.6 Other quality control samples ... 40
11.2.7 Evaluation of quality control sample results ... 40
11.2.8 Chain of custody ... 41
11.2.9 Equipment ... 41
11.3 Interferences ... 42
11.3.1 General ... 42
11.3.2 Large sample volume ... 42
11.3.3 Cohesive soils ... 42
11.3.4 Soil moisture ... 42
11.3.5 Low ambient temperatures ... 42
11.3.6 Heterogeneous stratigraphy ... 42
11.3.7 Seepage front ... 42
11.3.8 Perched water table horizon ... 43
11.3.9 Contamination ... 43
11.3.10 Breakthrough ... 43
11.4 Interpretation of soil gas analyses for VOCs ... 43

Annex A (informative) Standard equipment and instruments used for soil gas sampling for VOCs .. 44

Annex B (informative) Portable equipment to measure gases ... 46

Annex C (informative)Equipmenttomeasureflowratesandboreholepressure ... 48

Annex D (informative)Exampleofsamplingsheet ... 50

Bibliography ... 52
