

ISO 18400-204:2017-01 (E)

Soil quality - Sampling - Part 204: Guidance on sampling of soil gas

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	2
3	Terms and definitions	2
4	Preliminary items to be considered	5
5	Basic principles	6
5.1	Physical and chemical principles	6
5.1.1	Permanent gases	6
5.1.2	Volatile organic compounds	7
5.2	Environmental conditions	7
5.3	Soil gas dynamics	9
5.4	Identifying the source of soil gas	9
6	Requirements for sampling plan	10
6.1	General considerations for sampling plan	10
6.1.1	Objectives and general recommendations	10
6.1.2	Initial explorations (field screening)	12
6.1.3	Known contamination centre	12
6.1.4	Determination of the contamination hot spots (areas showing highest concentrations) and gas monitoring wells location	12
6.1.5	Determination of horizontal and vertical distribution of VOCs	13
6.1.6	Observation of spatial distribution of VOCs in the course of time	13
6.1.7	Evaluation of soil gases contribution to ambient, indoor and/or outdoor air	13
6.2	Working ranges of measurement methods	13
6.3	Monitoring well options	14
6.4	Sampling plan	17
6.4.1	Horizontal location of sampling devices	17
6.4.2	Monitoring depths	18
6.4.3	Timing and frequency of monitoring	19
6.4.4	Sample volumes and sampling rates	20
7	Construction of monitoring installations	21
7.1	General	21
7.1.1	Environmental conditions	21
7.1.2	Instruments	21
7.2	Soil gas sampling devices	21
7.2.1	Passive soil gas sampling	21
7.2.2	Sub-slab	22
7.2.3	Driven probes	22
7.2.4	Gas-monitoring standpipe in a borehole	23
8	Sampling	26
8.1	Generic consideration	26
8.2	Preparation of the monitoring installations	29
8.2.1	Preparation of the sampling point	29

8.2.2	Leakage test	29
8.2.3	Purge	29
8.3	Active sampling	30
8.3.1	General	30
8.3.2	Sorbent tubes or filters	31
8.3.3	Sample containers -- Sampling bags	34
8.3.4	Sparging	35
8.3.5	Sample containers -- Pressurized containers	35
8.4	Passive sampling	35
8.5	Sampling for on-site measurements	36
9	Identification, packaging and transport of samples for laboratory analysis	37
9.1	Identification	37
9.2	Packaging and transport	37
10	Sampling report	37
11	Quality assurance	38
11.1	General	38
11.2	Quality control samples	39
11.2.1	General	39
11.2.2	Blind replicate samples	40
11.2.3	Split samples	40
11.2.4	Trip blanks	40
11.2.5	Field blanks	40
11.2.6	Other quality control samples	40
11.2.7	Evaluation of quality control sample results	40
11.2.8	Chain of custody	41
11.2.9	Equipment	41
11.3	Interferences	42
11.3.1	General	42
11.3.2	Large sample volume	42
11.3.3	Cohesive soils	42
11.3.4	Soil moisture	42
11.3.5	Low ambient temperatures	42
11.3.6	Heterogeneous stratigraphy	42
11.3.7	Seepage front	42
11.3.8	Perched water table horizon	43
11.3.9	Contamination	43
11.3.10	Breakthrough	43
11.4	Interpretation of soil gas analyses for VOCs	43
Annex A (informative) Standard equipment and instruments used for soil gas sampling for VOCs ..		44
Annex B (informative) Portable equipment to measure gases		46
Annex C (informative) Equipment to measure flow rates and borehole pressure		48
Annex D (informative) Example of sampling sheet		50
Bibliography		52
