DIN EN ISO 13843:2018-03 (E)

Water quality - Requirements for establishing performance characteristics of quantitative microbiological methods (ISO 13843:20 17)

Contents

Page

European foreword ... **4**
Foreword ... **5**
Introduction ... **6**
1 Scope ... **7**
2 Normative references ... **7**
3 Terms and definitions ... **7**
4 Basic concepts ... **10**
4.1 General ... 10
4.2 Characterization ... 13
4.3 Verification ... 14
4.4 Method comparison ... 14
4.5 Samples ... 15
5 Specifications: some guideline values ... **15**
6 Designs for determining performance characteristics of a method ... **16**
6.1 General considerations ... 16
6.2 Determination of sensitivity, specificity, efficiency, selectivity, false positive rate and false negative rate ... 16
6.2.1 Type of samples to be used ... 16
6.2.2 Number of samples ... 17
6.2.3 Procedure ... 17
6.2.4 Categorical performance characteristics ... 17
6.2.5 Worked example ... 18
6.3 Determination of the upper limit and consideration of the lower limit of detection ... 20
6.3.1 Working range ... 20
6.3.2 Upper limit related to linearity ... 20
6.3.3 Type and number of samples to be used ... 20
6.3.4 Worked example ... 21
6.3.5 The lower limit of detection ... 22
6.4 Assessment of precision: Determination of repeatability and reproducibility ... 22
6.4.1 General ... 22
6.4.2 Repeatability ... 23
6.4.3 Intralaboratory reproducibility ... 24
6.5 Robustness ... 26
6.5.1 General ... 26
6.5.2 Experimental designs for effects due to time and temperature ... 26
6.6 Relative recovery ... 27
6.6.1 General ... 27
6.6.2 Determination of relative recovery ... 27
6.7 Uncertainty of counting ... 28
6.7.1 General ... 28
6.7.2 Experimental design for assessing the uncertainty of counting colonies ... 28
6.7.3 Example of individual (or personal) uncertainty of counting colonies ... 28
6.7.4 Example of intralaboratory uncertainty of counting colonies ... 29
6.7.5 Example of intralaboratory uncertainty of reading MPN ... 29
7 Designs for single laboratory verification of a method ... **30**
7.1 General considerations ... 30

7.2 Calculation of sensitivity, specificity, efficiency, selectivity, false positive rate and false negative rate 30
7.2.1 Type of sample to be used 30
7.2.2 Number of samples 32
7.2.3 Procedure for confirmation 32
7.2.4 Categorical performance characteristics 32
7.3 Determination of repeatability 32
7.4 Uncertainty of counting 32
7.5 Procedure for single laboratory verification 32
Annex A (informative) **Mathematical models of variation** **36**
Annex B (normative) **Assessment of the lower limits** **46**
Annex C (normative) **Assessment of the upper limit** **49**
Annex D (normative) **Determination of the operational variability in repeatability and intralaboratory reproducibility conditions** **50**
Annex E (normative) **Uncertainty of counting** **54**
Annex F (normative) **Determination of the operational variability (interlaboratory reproducibility) in a collaborative performance study** **56**
Annex G (informative) **Glossary of principal symbols** **64**
Bibliography **66**
