Water quality - Sampling - Part 12: Guidance on sampling of bottom sediments from rivers, lakes and estuarine areas

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Sampling strategy	3
4.1	General	3
4.2	Type of investigation	3
4.2.1	General	3
4.2.2	Chemical investigation	3
4.2.3	Physical investigation	3
4.2.4	Biological and microbiological investigation	4
4.3	Choice of sampling site	4
4.4	Choice of sampling point	4
4.5	Choice of sampling method	5
4.5.1	General	5
4.5.2	Consolidated bottom sediment	5
4.5.3	Unconsolidated bottom sediment	6
4.6	Frequency and time of sampling	6
4.7	Site conditions	6
4.7.1	General	6
4.7.2	Meteorological and climatic conditions	6
4.7.3	Hydrological conditions	7
5	Sampling equipment	8
5.1	General	8
5.2	Grab systems	8
5.3	Corer systems	10
6	Sampling procedure	13
6.1	Sampling container materials and types	13
6.2	Composite samples	13
7	Storage, transport and stabilization of samples	14
8	Safety	15
9	Sample identification and records	15
Annex A (informative) Description of the scissor-grab system (van Veen type)		17
Annex B (informative) Description of the piston drill system		19
Annex C (informative) Description of the corer system involving a diver		21
Annex D (informative) Description of the Beaker sampler system		22

Annex E (informative) Description of the sealed core sampler system	25
Annex F (informative) Description of the wedge core or Vrijwit drill system	27
Annex G (informative) Description of the gravity corer system	29
Annex H (informative) Description of the Jenkins mud sampler system	31
Annex I (informative) Description of the Craib corer system	33
Annex J (informative) Description of a piston corer	35
Annex K (informative) Description of peat borers	38
Annex L (informative) Freeze coring	40
Annex M (informative) Description of sediment sampler with slicing mechanism	44
Bibliography	46
