

ISO 5667-12:2017-07 (E)

Water quality - Sampling - Part 12: Guidance on sampling of bottom sediments from rivers, lakes and estuarine areas

Contents	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Sampling strategy	3
4.1 General	3
4.2 Type of investigation	3
4.2.1 General	3
4.2.2 Chemical investigation	3
4.2.3 Physical investigation	3
4.2.4 Biological and microbiological investigation	4
4.3 Choice of sampling site	4
4.4 Choice of sampling point	4
4.5 Choice of sampling method	5
4.5.1 General	5
4.5.2 Consolidated bottom sediment	5
4.5.3 Unconsolidated bottom sediment	6
4.6 Frequency and time of sampling	6
4.7 Site conditions	6
4.7.1 General	6
4.7.2 Meteorological and climatic conditions	6
4.7.3 Hydrological conditions	7
5 Sampling equipment	8
5.1 General	8
5.2 Grab systems	8
5.3 Corer systems	10
6 Sampling procedure	13
6.1 Sampling container materials and types	13
6.2 Composite samples	13
7 Storage, transport and stabilization of samples	14
8 Safety	15
9 Sample identification and records	15
Annex A (informative) Description of the scissor-grab system (van Veen type)	17
Annex B (informative) Description of the piston drill system	19
Annex C (informative) Description of the corer system involving a diver	21
Annex D (informative) Description of the Beeker sampler system	22

Annex E (informative) Description of the sealed core sampler system	25
Annex F (informative) Description of the wedge core or Vrijwit drill system	27
Annex G (informative) Description of the gravity corer system	29
Annex H (informative) Description of the Jenkins mud sampler system	31
Annex I (informative) Description of the Craib corer system	33
Annex J (informative) Description of a piston corer	35
Annex K (informative) Description of peat borers	38
Annex L (informative) Freeze coring	40
Annex M (informative) Description of sediment sampler with slicing mechanism	44
Bibliography	46
