

DIN EN 16932-1:2018-07 (E)

Drain and sewer systems outside buildings - Pumping systems - Part 1: General requirements

Contents		Page
European foreword		4
Introduction		5
1	Scope	7
2	Normative references	7
3	Terms and definitions	8
4	General	11
5	Health and safety	11
6	Types of pumping systems	11
6.1	Introduction	11
6.2	Single pumping station systems	12
6.3	Lift stations	12
6.3.1	General	12
6.3.2	Pumping stations with screw pumps	12
6.4	Pressure sewer systems	13
6.5	Vacuum sewer systems	14
6.6	Selection	15
7	Planning of pumping systems	17
7.1	Introduction	17
7.2	Performance requirements	17
7.3	Location	18
7.3.1	General	18
7.3.2	Location of pumping stations and vacuum stations	18
8	Detailed design of pumping stations and vacuum stations	19
8.1	Introduction	19
8.2	External layout and access	19
8.3	Environmental impact	20
8.3.1	General	20
8.3.2	Impact of discharges from overflows	20
8.3.3	Noise and vibration	20
8.3.4	Odour control	20
8.3.5	Visual impact	20
8.4	Structural design	20
8.5	Power supply	21
8.6	Resilience	21
8.7	Pump units	22
8.7.1	General	22
8.7.2	Impellers	23
8.7.3	Pump drivers and drives	23
8.8	Instrumentation, controls and electrical equipment	24
8.8.1	General	24
8.8.2	Control systems	24
8.8.3	Monitoring	24

8.8.4	Power switchgear and controlgear assemblies (PSC-ASSEMBLIES)	25
8.9	Cabinets and buildings	26
8.10	Maintenance considerations	26
9	Detailed design of rising mains and vacuum pipelines	26
9.1	Introduction	26
9.2	Structural design	26
9.3	Choice of materials and components	27
9.4	Discharge points	28
9.5	Valves and valve chambers	28
9.5.1	Valves	28
9.5.2	Valve chambers	28
9.6	Means of inspection	29
10	Installation	29
10.1	Installation of pipelines	29
10.2	Installation of pumping stations and vacuum stations	29
11	Testing and commissioning	29
11.1	Commissioning	29
12	Operations and maintenance	29
12.1	Introduction	29
12.2	Inspection and maintenance activities	30
12.3	Operations and maintenance manuals and training	31
	Bibliography	32
