

DIN EN 16932-2:2018-07 (E)

Drain and sewer systems outside buildings - Pumping systems - Part 2: Positive pressure systems

Contents		Page
European foreword		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		5
4 Symbols and units		7
5 General		8
6 Planning of positive pressure systems		8
6.1 Type of pumping station		8
6.1.1 Introduction		8
6.1.2 Pumping stations with submersible pumps		9
6.1.3 Pumping stations with dry installed pumps		11
6.1.4 Other types of pumping stations		11
6.2 Selection of type of pumping station		12
6.3 Route and profile of rising mains		12
7 Hydraulic design of pumping systems		13
7.1 Introduction		13
7.2 Establish inflow rates		15
7.2.1 Foul wastewater pumping stations		15
7.2.2 Surface water pumping installations		15
7.2.3 Combined sewer pumping stations		15
7.3 Select desired pump flow rates		15
7.4 Dimensioning collection tank		15
7.5 Select rising main diameter		16
7.5.1 Pumping stations		16
7.5.2 Pressure sewer systems		17
7.6 Retention period		17
7.7 Calculation of system characteristics		18
7.7.1 System head calculation		18
7.7.2 Pressure sewer systems		20
7.8 Selection of pump units and duty points		20
7.9 Check pressure transients (waterhammer)		22
8 Detailed design of pumping stations		23
8.1 General		23
8.2 Layout		23
8.3 Collection tank		24
8.4 Pump units		25
8.4.1 Pumps		25
8.4.2 Air compressor units		25
8.5 Controls and electrical equipment and instrumentation		25
9 Septicity		26
9.1 General		26
9.2 Control of septicity		27

9.2.1	General	27
9.2.2	Limiting retention period	27
9.2.3	Air flushing	27
9.2.4	Chemical treatment	28
9.2.5	Hydrogen sulphide stripping	28
9.2.6	Dilution of the septic wastewater in fresh wastewater	28
10	Testing and verification	28
10.1	Pumping stations	28
10.2	Rising mains	28
10.3	Commissioning	28
11	Operation and maintenance manual	29
	Bibliography	30
