DIN EN 16932-3:2018-07 (E)

Drain and sewer systems outside buildings - Pumping systems - Part 3: Vacuum systems

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and units 7

5 General 8

6 Planning vacuum sewer systems 8
6.1 Basis of design 8
6.2 Location of collection chambers 8
6.3 Route and profile of vacuum pipelines 9
6.4 Hydro pneumatic design of the system 11
6.5 Vacuum station design 13
6.5.1 General 13
6.5.2 Sizing the vacuum vessel for flushing activities 16
6.6 Power consumption 17

7 Collection chambers on vacuum sewer systems 18
7.1 General 18
7.2 Collection chambers 18
7.3 Interface valve units 20
7.4 Explosion safety 20
7.5 Life of membranes and seals 21

8 Vacuum pipelines 21
8.1 Vacuum drain connections 21
8.2 Branch connections 21
8.3 Means of isolation 22

9 Detailed design of vacuum stations 22
9.1 Selection of type of vacuum pumping station 22
9.2 Vacuum vessel 23
9.3 Forwarding equipment 23
9.4 Non-return valves 23
9.5 Vacuum pumps 23

10 Controls, electrical equipment and instrumentation 25
10.1 Collection chamber controls 25
10.1.1 Level sensor 25
10.1.2 Interface valve controller 25
10.1.3 Monitoring of the interface valve 26
10.2 Vacuum station control 26
10.3 Explosion safety 26

11 Installation 27

12 Testing and verification 27
12.1 Collection chambers 27
12.2 Interface valve units 27
12.3 Vacuum pipelines 27
12.4 Commissioning tests 27

13 Operation and maintenance 28
13.1 General 28
13.2 Maintenance 28
13.3 Operation and maintenance manual 28
13.4 Power consumption 29

Annex A (informative) Example of a dimensioning model 30

Annex B (normative) Testing of vacuum sewer system 32

B.1 Testing of interface valve unit 32
B.1.1 Testing requirements 32
B.1.2 Preliminary checks 32
B.1.3 Endurance test 32
B.1.3.1 Test rig description 32
B.1.3.2 Test procedure 32
B.1.4 Resistance to blockage test 33
B.1.5 Submergence test 33
B.2 Testing of pipelines 33
B.2.1 Calibrating test equipment 33
B.2.2 General 34
B.2.3 Interim testing 34
B.2.4 Final testing 34
B.3 Leak testing of collection chambers 34
B.4 Commissioning tests 34
B.4.1 General 34
B.4.2 Noise 34
B.4.3 Minimum vacuum and vacuum recovery time 34
B.4.4 Air/water ratio 35
B.4.5 Operation of vacuum station controls 35
B.4.6 Replacement times 35
