

# DIN EN 16932-3:2018-07 (E)

## Drain and sewer systems outside buildings - Pumping systems - Part 3: Vacuum systems

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	5
4	Symbols and units .....	7
5	General .....	8
6	Planning vacuum sewer systems .....	8
6.1	Basis of design .....	8
6.2	Location of collection chambers .....	8
6.3	Route and profile of vacuum pipelines .....	9
6.4	Hydro pneumatic design of the system .....	11
6.5	Vacuum station design .....	13
6.5.1	General .....	13
6.5.2	Sizing the vacuum vessel for flushing activities .....	16
6.6	Power consumption .....	17
7	Collection chambers on vacuum sewer systems .....	18
7.1	General .....	18
7.2	Collection chambers .....	18
7.3	Interface valve units .....	20
7.4	Explosion safety .....	20
7.5	Life of membranes and seals .....	21
8	Vacuum pipelines .....	21
8.1	Vacuum drain connections .....	21
8.2	Branch connections .....	21
8.3	Means of isolation .....	22
9	Detailed design of vacuum stations .....	22
9.1	Selection of type of vacuum pumping station .....	22
9.2	Vacuum vessel .....	23
9.3	Forwarding equipment .....	23
9.4	Non-return valves .....	23
9.5	Vacuum pumps .....	23
10	Controls, electrical equipment and instrumentation .....	25
10.1	Collection chamber controls .....	25
10.1.1	Level sensor .....	25
10.1.2	Interface valve controller .....	25
10.1.3	Monitoring of the interface valve .....	26
10.2	Vacuum station control .....	26
10.3	Explosion safety .....	26
11	Installation .....	27

12	Testing and verification .....	27
12.1	Collection chambers .....	27
12.2	Interface valve units .....	27
12.3	Vacuum pipelines .....	27
12.4	Commissioning tests .....	27
13	Operation and maintenance .....	28
13.1	General .....	28
13.2	Maintenance .....	28
13.3	Operation and maintenance manual .....	28
13.4	Power consumption .....	29
Annex A (informative) Example of a dimensioning model .....		30
Annex B (normative) Testing of vacuum sewer system .....		32
B.1	Testing of interface valve unit .....	32
B.1.1	Testing requirements .....	32
B.1.2	Preliminary checks .....	32
B.1.3	Endurance test .....	32
B.1.3.1	Test rig description .....	32
B.1.3.2	Test procedure .....	32
B.1.4	Resistance to blockage test .....	33
B.1.5	Submergence test .....	33
B.2	Testing of pipelines .....	33
B.2.1	Calibrating test equipment .....	33
B.2.2	General .....	34
B.2.3	Interim testing .....	34
B.2.4	Final testing .....	34
B.3	Leak testing of collection chambers .....	34
B.4	Commissioning tests .....	34
B.4.1	General .....	34
B.4.2	Noise .....	34
B.4.3	Minimum vacuum and vacuum recovery time .....	34
B.4.4	Air/water ratio .....	35
B.4.5	Operation of vacuum station controls .....	35
B.4.6	Replacement times .....	35
