DIN EN 15885:2019-10 (E)

Classification and characteristics of techniques for renovation, repair and replacement of drains and sewers

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Symbols and abbreviations 9

5 Classification of renovation techniques for drains and sewers 9
5.1 General 9
5.2 Lining with continuous pipes 10
5.3 Lining with close-fit pipes 13
5.4 Lining with cured-in-place pipes 15
5.5 Lining with discrete pipes 18
5.6 Lining with spirally-wound pipes 21
5.7 Lining with pipe segments 24
5.8 Lining with a rigidly anchored plastics inner layer (RAPL) 25
5.9 Lining with sprayed material 27

6 Classification of trenchless replacement techniques for drains and sewers 30
6.1 General 30
6.2 Replacement by pipe bursting 30
6.3 Replacement by pipe eating method 33

7 Classification of repair techniques for drains and sewers 35
7.1 General 35
7.2 Repair by injection 36
7.3 Repair with cured-in-place components 40
7.4 Repair with trowelled or moulded material 42
7.5 Repair with internal mechanical devices 44
7.6 Repair by flood grouting 46

8 Classification of performance characteristics for replacement, renovation and repair 47
8.1 General 47
8.2 Structural integrity 48
8.2.1 External loads capacity 48
8.2.2 Internal loads capacity 48
8.3 Impacts on site 49
8.4 Technique requirement for man entry 49
8.5 Technique requirement for shape 49
8.6 Hydraulic performance 49

9 Performance levels for replacement, renovation and repair 50

Annex A (informative) Place of this European Standard in the context of the overall design of replacement, renovation and repair of drains and sewers 51
