ISO 20761:2018 (E)

Water reuse in urban areas — Guidelines for water reuse safety evaluation — Assessment parameters and methods

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 Water reuse safety

6 Water reuse safety parameters

7 Framework for safety evaluation of water reuse in urban areas

8 Water quality parameters selection for water reuse in urban areas

- 8.1 General
- 8.2 Parameter considerations for environmental and recreational uses in urban areas
- 8.2.1 General
- 8.2.2 Important aspects for safety and public acceptance considerations
- 8.2.3 Water quality parameters of interest
- 8.3 Parameter considerations for municipal non-potable uses in urban areas
- 8.3.1 General
- 8.3.2 Important aspects for safety and public acceptance considerations
- 8.3.3 Water quality parameters of interest
- 8.4 Parameter considerations for other uses in urban areas
- 8.4.1 Important aspects for safety and public acceptance considerations
- 8.4.2 Water quality parameters of interest

9 Water reuse safety evaluation

- 9.1 General
- 9.2 Water quality parameters and criteria selection
- 9.3 Water quality monitoring
- 9.4 Safety evaluation in water reuse in urban areas
- 9.4.1 General
- 9.4.2 Health safety evaluation
- 9.4.3 Environmental safety evaluation

Annex A (informative) Information of water quality criteria and guidelines for water reuse applications in some countries

Annex B (informative) Information of environmental safety evaluation for water reuse in extreme situations

- B.1 Principle
