ISO 18400-202:2018 (E)

Soil quality — Sampling — Part 202: Preliminary investigations

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 General/principle

5 Phases of investigation

6 Objectives of preliminary investigations

7 Scope of preliminary investigations

- 7.1 General/strategy
- 7.2 Desk study
- 7.2.1 General
- 7.2.2 Information on past and present use
- 7.2.3 Information on geology, pedology, geomorphology, hydrology and hydrogeology
- 7.2.4 Ecology and archaeology
- 7.3 Consultations
- 7.4 Site reconnaissance

8 Development of the preliminary conceptual site model

- 8.1 Overall conceptual site model
- 8.2 Characteristic distributions of the physico-chemical properties
- 8.3 Formulation of contamination-related hypotheses
- 8.4 Preliminary qualitative risk assessment for potentially contaminated sites
- 8.5 Further investigations

9 Reporting the preliminary investigation and the conceptual site model

Annex A (informative) Contaminants of potential concern and industry/contaminant matrix

Page count: 34
