DIN EN ISO 12010:2019-09 (E)

Water quality - Determination of short-chain polychlorinat ed alkanes (SCCP) in water - Method using gas chromatography-mass spectrometry (GC-MS) and negative-ion chemical ionization (NCI) (ISO 12010:2019)

Contents

Page

Annex C (informative) Typical GC-MS conditions 27

C.1 Example 1 27
C.2 Example 2 27
C.3 Example 3 28
C.4 Example 4 28

Annex D (informative) Typical chromatograms of standard solutions and quality control check solutions 1 g/ml 30

Annex E (informative) Presentation of goodness of fit 37

Annex F (normative) Alternative clean-up with column chromatography 38

F.1 Reagents 38
F.2 Extract clean-up procedure 38
F.3 Interferences with chlorinated chemicals (technical products) 39

Annex G (informative) Alternative clean-up with gel chromatography 41

Annex H (informative) Chromatograms of real SPM samples 42

Annex I (informative) Performance data 46

I.1 Performance data of ISO 12010:2012 46
I.2 Performance data of this document 46
