ISO 21115:2019-04 (E)

Water quality - Determination of acute toxicity of water samples and chemicals to a fish gill cell line (RTgill-W1)

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Principle **2**
4.1 Cell viability assay 2
4.2 Key differences in water sample and chemical testing procedure 3

5 Interferences **3**
5.1 Matrix effects by effluent samples 3
5.2 Interferences of water constituents or chemicals with fluorescent dye assays 4

6 Reagents **4**
6.1 General 4
6.2 Ready-for-use purchased reagents 4
6.3 Freshly prepared solutions 6

7 Apparatus and material **8**
7.1 General equipment 8
7.2 Whole-water sample/ex preparation 9
7.3 Cell seeding and plate dosing 9
7.4 Preparation/dosing of stock solutions 9
7.5 Sampling for chemical analysis 10
7.6 Detection of cytotoxicity 10

8 Procedure **10**
8.1 Cell line used 10
8.2 Seeding cells into 24-well plates 10
8.2.1 General 10
8.2.2 Preparation of working materials and solutions for cell seeding 10
8.2.3 Seeding cells: step-by-step performance 11
8.3 Cell exposure 12
8.3.1 General 12
8.3.2 Exposure of cells to water samples 13
8.3.3 Exposure of cells to chemicals 18
8.4 Determination of cytotoxicity 21
8.4.1 General 21
8.4.2 Visual control of cell damage 22
8.4.3 Preparation of working materials and solutions for cytotoxicity measurement 23
8.4.4 Measuring cytotoxicity — Step-by-step performance 23
8.4.5 Parameters for the fluorescence measurement 24
8.4.6 Chemical analyses of the test samples 24

9 Preparation and expression of results **24**

10 Validity criteria of the test **25**
10.1 No cells-control wells 25
10.2 Positive control in L-15/ex 25
10.3 Positive control in w-ws/ex 26
10.4 Solvent control 26

Annex A (informative) **Routine cell culture of RTgill-W1** **27**
Annex B (informative) **Performance of the RTgill-W1 cell line assay** **32**
Bibliography **38**
