DIN EN ISO 21253-1:2022-12 (E)

Water quality - Multi-compound class methods - Part 1: Criteria for the identification of target compounds by gas and liquid chromatography and mass spectrometry (ISO 21253-1:2019)

Contents

Page

European foreword 3

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Abbreviated terms 7

5 Principle 8

6 Apparatus 8

7 Identification of target compounds 9
7.1 Procedure for identification of organic compounds with chromatography-mass spectrometry 9
7.2 Step 1: Chromatographic separation 10
7.3 Step 2: Mass spectrometric evaluation 11
7.3.1 Mass spectrometric detection 11
7.3.2 Selection of diagnostic ions 11
7.3.3 Assigning identification points 12
7.4 Step 3: Additional analytical confirmation evaluation 13
7.5 Reporting the presence of target compounds 14
7.5.1 Identification 14
7.5.2 Indication 14
7.5.3 Absence of the target compounds (<detection limit) 14

8 Test report 14

Annex A (informative) Recommendations for the most commonly used techniques 15

Annex B (normative) Criteria for full scan measurement 17

Annex C (informative) Diagnostic ions to be used for identification using GC-MSn and LC-MSn 18

Annex D (informative) Examples of calculating identification points 19
