ISO 24516-4:2019 (E)

Guidelines for the management of assets of water supply and wastewater systems — Part 4: Wastewater treatment plants, sludge treatment facilities, pumping stations, retention and detention facilities

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principal aspects of the management of assets

4.1 Objectives and requirements
4.1.1 Objectives
4.1.2 Functional requirements
4.1.3 Performance requirements
4.2 General aspects
4.2.1 General
4.2.2 Principal aspects — Wastewater utilities
4.2.3 Principal aspects — Wastewater systems
4.2.4 Integrating the principal aspects
4.3 Risks and life cycle aspects
4.3.1 Risk
4.3.2 Life cycle
4.4 Structuring the process for management of assets
4.4.1 General
4.4.2 Strategies for the management of assets
4.4.3 Periods of planning
4.4.4 Strategic level activities
4.4.5 Tactical level activities
4.4.6 Operational-level activities

5 Investigation

5.1 General
5.2 Purpose of investigation
5.3 Determine the scope of the investigation
5.4 Types of investigation
5.4.1 Hydraulic investigation
5.4.2 Investigation of the process technique
5.4.3 Environmental investigation
5.4.4 Structural investigation
5.4.5 Operational investigation
5.5 Data collection
5.5.1 General
5.5.2 Data requirements
5.5.3 Inventory data
5.5.4 Condition data
5.5.4.1 Failure data
5.5.4.2 Further condition data
5.5.5 Operational data
5.6 Data registering and data assignment
5.6.1 Data registering
5.6.2 Data assignment

5.6.3 Locational referencing
5.7 Review existing information
5.8 Inventory update
5.9 Review of performance information
5.10 Planning of investigation
5.11 Performance testing

6 Assessment

6.1 Principle
6.2 Assessment of hydraulic and pollutant elimination performance
6.3 Assessment of process performance
6.4 Assessment of environmental impact
6.5 Assessment of structural condition
6.6 Assessment of operational performance
6.7 Comparison with performance requirements
6.8 Identification of unacceptable impacts
6.9 Identification of causes of performance deficiencies

7 Planning

7.1 General
7.2 Develop integrated solutions
7.3 Assess solutions
7.4 Prepare action plan

8 Implementation

8.1 Introduction
8.2 Create/update plan
8.3 Carry out work
8.4 Monitor performance
8.5 Review performance

9 Operation and maintenance

9.1 General
9.2 Operation
9.3 Maintenance

10 Rehabilitation

10.1 General
10.2 Strategic plan for rehabilitation of physical infrastructure (long-term planning)
10.2.1 General
10.2.2 Strategic approaches
10.2.3 Budgeting
10.3 Tactical plan for rehabilitation of physical infrastructure (mid-term planning)
10.3.1 Risk-based approach to evaluation of priorities
10.3.2 Individual risk evaluation and prioritising for risk control
10.4 Operational plan — Implementation plan for rehabilitation measures (short-term planning)

11 Documentation and performance review

Annex A (informative) Objectives and functional requirements

A.1 Objectives
A.1.1 Public health and safety
A.1.2 Occupational health and safety
A.1.3 Environmental protection
A.1.4 Sustainable development
A.2 Functional requirements
A.2.1 Protection from flooding
A.2.2 Maintainability
A.2.3 Protection of receiving surface water bodies
A.2.4 Protection of groundwater
A.2.5 Prevention of odours and toxic, explosive and corrosive gases
A.2.6 Prevention of noise and vibration
A.2.7 Sustainable use of products and materials

A.2.8 Sustainable use of energy
A.2.9 Structural integrity and design life
A.2.10 Maintaining the flow
A.2.11 Watertightness
A.2.12 Not endangering adjacent structures and utility services
A.2.13 Input quality
A.2.14 Protection of biological hazards

Annex B (informative) Example for the content of a wastewater master plan

Annex C (informative) Examples of data relevant for the management of wastewater treatment plants

Annex D (informative) Risk-based assessment for rehabilitation

D.1 General
D.2 Asset failure likelihood estimation by age
D.3 Asset failure likelihood estimation from information on operation and maintenance
