ISO 7027:1999-12 (E)

Water quality - Determination of turbidity

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Sampling and samples 2

5 Semiquantitative methods of turbidity measurement 2
5.1 Measurement using the transparency testing tube 2
5.2 Measurement using the transparency testing disk 2

6 Quantitative methods of turbidity measurement using optical turbidimeters 3
6.1 General principles 3
6.2 Reagents 4
6.3 Measurement of diffuse radiation 5
6.4 Measurement of attenuated radiation 6

Annex A (informative) Results of an interlaboratory collaborative trial to evaluate the suitability of a synthetic polymer for use as a secondary standard to formazine in turbidity measurements 8
