

# ISO 24536:2019-10 (E)

## Service activities relating to drinking water supply, wastewater and stormwater systems - Stormwater management - Guidelines for stormwater management in urban areas

---

<b>Contents</b>		<b>Page</b>
Foreword .....		vi
Introduction .....		vii
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative reference .....</b>	<b>1</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>1</b>
<b>4</b>	<b>General overview .....</b>	<b>1</b>
4.1	Principles .....	1
4.2	Basic concepts .....	2
4.3	Stormwater management process .....	3
<b>5</b>	<b>Objectives .....</b>	<b>4</b>
<b>6</b>	<b>Functional requirements .....</b>	<b>8</b>
6.1	General .....	8
6.2	Protection from surface water flooding .....	9
6.3	Protection from sewer flooding .....	9
6.4	Protection of surface receiving water bodies .....	10
6.5	Protection of groundwater .....	10
6.6	Maintainability .....	10
6.7	Integrity of structures .....	10
6.8	Sustainable use of products and materials .....	10
6.9	Sustainable use of energy .....	10
6.10	Protection of adjacent structures and utility services .....	10
6.11	Maintaining the flow .....	10
6.12	Watertightness .....	10
6.13	Prevention of odours and emission of toxic, explosive and corrosive gases .....	10
6.14	Prevention of noise and vibration .....	11
6.15	Input quality .....	11
6.16	Protection of downstream drainage systems .....	11
6.17	Protection from natural disaster events .....	11
6.18	Health and safety .....	11
6.18.1	General .....	11
6.18.2	Public health and safety .....	11
6.18.3	Occupational health and safety .....	11
<b>7</b>	<b>Performance requirements .....</b>	<b>12</b>
7.1	General .....	12
7.2	Examples of performance requirements .....	12
7.2.1	Protection of receiving water bodies .....	12
7.2.2	Protection from flooding .....	14
7.2.3	Structural integrity and design working life .....	15
<b>8</b>	<b>Design criteria .....</b>	<b>15</b>
8.1	Introduction .....	15

8.2	Hydraulic design criteria .....	16
8.2.1	Introduction .....	16
8.2.2	Full pipe design rainfall criteria .....	16
8.2.3	Flooding design criteria .....	17
8.2.4	Effect on downstream water bodies .....	18
8.3	Environmental design criteria .....	19
8.4	Structural design criteria .....	20
8.5	Operation and maintenance (O&M) design criteria .....	20
8.6	Amenity and biodiversity design criteria .....	20
8.6.1	Amenity design criteria .....	20
8.6.2	Biodiversity design criteria .....	20
9	Investigation .....	21
9.1	Introduction .....	21
9.2	Purpose of investigation .....	21
9.3	Review of performance information .....	22
9.4	Determine the scope of investigation .....	23
9.5	Review existing information .....	23
9.6	Inventory update .....	24
9.7	Hydraulic investigation .....	25
9.8	Hydrology .....	25
9.8.1	Selection of the design rainfall .....	25
9.8.2	Flood occurrence probability .....	27
9.8.3	Water quantity .....	27
9.8.4	Water quality .....	27
9.9	Environmental investigation .....	28
9.10	Structural investigation .....	28
9.11	Operational investigation .....	29
9.12	Existing facilities .....	29
9.13	Social consequences .....	29
10	Assessment .....	29
10.1	Introduction .....	29
10.2	Assessment of the hydraulic performance .....	30
10.3	Assessment of environmental impact .....	30
10.4	Assessment of structural condition .....	31
10.5	Assessment of operational performance .....	31
10.6	Assessment of social and economic benefits and public satisfaction .....	31
10.7	Comparison with performance requirements .....	31
10.8	Identification of unacceptable impacts .....	31
10.9	Identification of causes of performance deficiencies .....	31
10.10	Setting goals .....	31
10.11	Prioritization of measures .....	31
11	Planning .....	32
11.1	Planning principles .....	32
11.2	Basic planning concepts .....	32
11.3	System components .....	33
11.3.1	Overview .....	33
11.3.2	Components for quantity control .....	33
11.3.3	Components for quality control .....	34
11.4	Asset-related solutions .....	35
11.4.1	General .....	35
11.4.2	Stormwater network .....	36
11.4.3	Sustainable drainage systems .....	36
11.4.4	Utilization of existing components .....	37
11.4.5	Asset-related solutions through collaboration with other projects .....	38
11.5	Non-asset-related solutions .....	40
11.5.1	General .....	40
11.5.2	Demand control .....	40
11.5.3	Flood resilience approaches .....	41

11.5.4	Disaster preparedness and response .....	41
11.5.5	Emergency response and recovery .....	43
11.5.6	Utilization of information and communication technology (ICT) .....	44
11.5.7	Insurance .....	44
11.6	Management aspects of planning .....	45
11.7	Phased implementation plan .....	45
12	System performance evaluation .....	46
12.1	General .....	46
12.2	Cost-benefit analysis .....	46
12.3	Evaluation of system performance .....	46
12.4	Monitoring of system performance .....	47
12.5	Retrospective evaluation .....	47
Annex A (informative) The concept of the largest recorded rainfalls .....		48
Annex B (informative) Cost-benefit analysis: example of calculation methodologies .....		50
Bibliography .....		54
