

# DIN EN ISO 13162:2022-03 (E)

## Water quality - Carbon 14 - Test method using liquid scintillation counting (ISO 13162:2021)

---

Contents	Page
<b>European foreword</b>	3
<b>Foreword</b>	4
<b>Introduction</b>	5
<b>1 Scope</b>	7
<b>2 Normative references</b>	7
<b>3 Terms, definitions, symbols and abbreviations</b>	8
<b>4 Principle</b>	9
<b>5 Sampling and storage</b>	10
5.1 Sampling	10
5.2 Sample storage	10
<b>6 Reagents and equipment</b>	10
6.1 Reagents	10
6.1.1 Reference water for the blank	10
6.1.2 Calibration source solution	10
6.1.3 Scintillation solution	11
6.1.4 Quenching agent	11
6.2 Equipment	11
<b>7 Procedure</b>	11
7.1 Sample preparation	11
7.2 Preparation of the counting vial	11
7.3 Counting procedure	12
7.4 Calibration and verification	12
7.5 Measurement conditions	13
<b>8 Expression of results</b>	13
8.1 General	13
8.2 Calculation of activity concentration without sample preparation	13
8.3 Calculation of activity concentration with sample preparation	14
8.4 Decision threshold	14
8.5 Detection limit	15
8.6 Limits of the coverage intervals	15
8.6.1 Limits of the probabilistically symmetric coverage interval	15
8.6.2 Limits of the shortest coverage interval	15
8.7 Calculations using the activity per mass	16
<b>9 Test report</b>	16
<b>Annex A (informative) Extraction of total carbon by precipitation of calcium carbonate</b>	18
<b>Annex B (informative) Extraction of total carbon: absorption counting</b>	21
<b>Annex C (informative) Internal standard method</b>	24
<b>Annex D (informative) Numerical applications</b>	26
<b>Bibliography</b>	28
