ISO 23043:2021 (E)

Evaluation methods for industrial wastewater treatment reuse processes

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions and abbreviated terms

3.1 Terms and definitions
3.2 Abbreviated terms

4 Evaluation principles

4.1 Comprehensiveness
4.2 Operability
4.3 Relevance
4.4 Transparency

5 Evaluation procedure

5.1 General
5.2 Procedure description

6 Evaluation

6.1 Evaluation indicators
6.2 Evaluation method description
6.2.1 General
6.2.2 Evaluation steps
6.2.3 Example evaluation table

Annex A (informative) List of evaluation indicators and sub-indicators

A.1 Technology indicator
A.1.1 Te1 Technology maturity
A.1.2 Te2 Equipment utilization ratio
A.1.3 Te3 Equipment readiness ratio
A.1.4 Te4 Stability
A.1.5 Te5 System management
A.1.6 Te6 Maintainability and complexity of implementation
A.2 Environment indicator
A.2.1 En1 Conventional pollutants removal rate
A.2.2 En2 Other concerned pollutants removal rate
A.2.3 En3 Sludge production rate
A.2.4 En4 Total GHG emissions
A.2.5 En5 Energy sustainability index (ESI)
A.2.6 En6 Odour control and ventilation
A.3 Resource indicator
A.3.1 Re1 Wastewater reuse rate
A.3.2 Re2 Resource recovery
A.3.3 Re3 Energy recovery
A.3.4 Re4 Energy consumption
A.3.5 Re5 Chemicals consumption
A.4 Economy indicator
A.4.1 Ec1 Capital cost
A.4.2 Ec2 Operating cost
A.4.3 Ec3 Disposal cost

A.4.4 Ec4 Revenues

Annex B (informative) Quantify qualitative sub-indicators

Annex C (informative) Determination of weights

C.1 Determine the indicator weight
C.2 Weight value questionnaire

Annex D (informative) Example of evaluation case

Page count: 31
