ISO 20468-5:2021 (E)

Guidelines for performance evaluation of treatment technologies for water reuse systems — Part 5: Membrane filtration

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms, definitions, and abbreviated terms

3.1 Terms and definitions
3.2 List of abbreviated terms

4 Concepts of membrane filtration technology for water reuse

4.1 General
4.2 Membrane type and treatment objectives
4.3 Filtration unit process
4.4 Membrane filtration process design and pre- and post-shipment tests

5 Principles and general guidelines for performance evaluation

5.1 General
5.2 Functional requirements for membrane filtration process
5.3 Non-functional requirements for membrane filtration process

6 Performance evaluation for functional requirement

6.1 General
6.2 Water quality based performance evaluation
6.3 Process based performance evaluation
6.4 Integrity monitoring
6.4.1 Direct Integrity Monitoring
6.4.2 Indirect integrity monitoring

7 Performance evaluation for non-functional requirements

7.1 General
7.2 Energy consumption
7.3 Chemical consumption
7.4 Brine water disposal or treatment
7.5 Solid waste for disposal
7.6 Life cycle cost

Annex A (informative) Examples of parameters on the specification sheet

Annex B (informative) Recommended frequency of data collection

Annex C (informative)
