

DIN EN ISO 5667-1:2023-04 (E)

Water quality - Sampling - Part 1: Guidance on the design of sampling programmes and sampling techniques (ISO 5667-1:2020)

Contents		Page
European foreword		4
Foreword		5
1 Scope		6
2 Normative references		6
3 Terms and definitions		6
4 General safety precautions		6
4.1 Safety of Personnel		6
4.2 General environmental considerations		7
5 Design of sampling programmes		7
5.1 General		7
5.2 Sampling personnel		8
5.3 Broad objectives for the design of sampling programmes		8
5.4 Specific considerations in relation to variability		10
5.5 Identifying the sampling location		10
6 Characteristics and conditions affecting sampling		11
6.1 General		11
6.2 Variations from normal sampling conditions		12
7 Standards for sampling from water		12
7.1 General standards in the 5667 series		12
7.2 Standards outside the 5667 series that provide guidance on sampling programmes in specific areas		13
7.3 Standards within the ISO 5667 series providing specific guidance on the sampling of a range waters		14
8 Time and frequency of sampling		18
8.1 General		18
8.2 Water quality management programmes		18
8.3 Quality characterization programmes		18
8.4 Programmes for investigation of causes of contamination		18
8.5 Statistical considerations		19
8.5.1 Establishment of sampling programmes		19
8.5.2 Random and systematic variations of water quality		19
8.6 Duration of sampling occasion and composite samples		20
9 Flow measurements and situations justifying flow measurements for water quality purposes		20
9.1 General		20
9.2 Direction of flow		21
9.3 Velocity of flow		21
9.4 Discharge rate		21
9.5 Flow profile		21
9.6 Cross-sectional area		22
9.7 Justification for flow measurements in water quality control management		22
9.7.1 Treatment plant loads		22
9.7.2 Dilution effects (flux calculations)		22
9.7.3 Mass flow calculations		22
9.7.4 Transport of contaminants and rates of recovery		22

9.7.5	Flow-related parameters.....	22
9.7.6	Groundwaters.....	23
9.8	Methods available for flow measurement.....	23
10	Current sampling techniques.....	24
10.1	General.....	24
10.2	Spot samples.....	24
10.3	Periodic samples (discontinuous).....	25
10.3.1	Periodic samples taken at fixed time-intervals (time-dependent) or constant time constant volume (C.T.C.V.).....	25
10.3.2	Periodic samples taken at fixed flow-intervals (volume-dependent) or constant time variable volume variable time (C.T.V.T.).....	25
10.3.3	Periodic samples taken at fixed flow-intervals (flow-dependent) or constant volume variable volume sampling (C.V.V.V.).....	25
10.4	Continuous samples.....	25
10.4.1	Continuous samples taken at fixed flow rates (time-continuous samples).....	25
10.4.2	Continuous samples taken at variable flow rates (flow-continuous samples).....	25
10.5	Series sampling.....	25
10.6	Composite samples.....	26
10.7	Large-volume samples.....	26
11	Passive sampling.....	26
12	Sampling equipment for physical or chemical characteristics.....	27
12.1	General.....	27
12.2	Sampling containers.....	27
12.2.1	General.....	27
12.2.2	Types of sample container.....	28
12.3	Equipment for spot sampling.....	29
12.4	Sampling equipment for sediments.....	29
12.4.1	Grab or dredge sampling.....	29
12.4.2	Core samplers.....	29
12.5	Sampling equipment for dissolved gases and volatile materials.....	29
12.6	Sampling equipment for radioactivity characteristics.....	30
12.7	Sampling equipment for biological and microbiological characteristics.....	30
12.8	Automatic sampling equipment.....	30
12.9	Sampling equipment for passive sampling.....	31
12.10	Sampling equipment for suspended sediments.....	31
13	Quality assurance and quality control of environmental water sampling and handling.....	31
13.1	General.....	31
13.2	Sources of contamination.....	32
13.3	Control or prevention of contamination.....	32
14	Transport to, and storage of samples at, the depot or laboratory.....	33
15	Sample identification and records.....	33
15.1	General.....	33
15.2	Data management.....	34
15.3	Samples that might be used for legal purposes.....	34
	Annex A (informative) Diagrams illustrating types of periodic and continuous samples.....	35
	Annex B (informative) Diagrams illustrating types of field paperwork and labels etc.....	38
	Annex C (informative) Alternative and emerging sampling techniques.....	40
	Annex D (informative) Preparation of sampling equipment.....	42
	Bibliography.....	43
