DIN EN 1253-7:2023-06 (E)

Gullies for buildings - Part 7: Trapped floor gullies with mechanical closure

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Design and construction 8
4.1 General 8
4.2 Appearance 8
4.3 Apertures in gratings 8
4.4 Resistance of trap with mechanical closure to pressure 9
4.4.1 Requirements 9
4.4.2 Test method 9
4.5 Blockage prevention 10
4.5.1 Access for cleaning 10
4.5.2 Clogging test 11
4.6 Places of installation 13
4.7 Materials 13
4.8 Thermal behaviour of floor gullies 13
4.8.1 General 13
4.8.2 Requirements 13
4.8.3 Test method 13
4.8.4 Additional test for floor gullies for use with sheet floor coverings and liquid applied membranes 14
4.9 Tightness 15
4.9.1 Odour-tightness 15
4.9.2 Watertightness of bodies 16
4.9.3 Watertightness of extensions 16
4.10 Mechanical strength 17
4.10.1 Loading strength 17
4.10.2 Clamping ring strength 19
4.10.3 Additional mechanical strength according to the installation 19
4.10.4 Floor gullies for use with liquid applied membranes 23
4.11 Flow rates 23
4.11.1 Requirements 23
4.11.2 Test method 24
4.11.3 Test arrangement 24

5 Allocation and sequence of tests 25

6 Marking 27

7 Evaluation of conformity 28

Annex A (normative) Examples of top view of the positioning of shape of test blocks applied on the gratings 29

Annex B (normative) Test solution 31
