

# DIN EN 17800:2023-03 (E)

## Life cycle cost (LCC) and life cycle assessment (LCA) for CO<sub>2</sub> emissions in ductile iron pipe systems

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms, definitions and abbreviated terms .....	6
3.1	Terms and definitions .....	6
3.2	Abbreviated terms .....	9
4	Basic concept of life cycle cost (LCC) for ductile iron pipe systems .....	9
4.1	Definition of life cycle cost .....	9
4.2	Calculation method .....	10
5	Breakdown of life cycle cost .....	12
5.1	Acquisition cost .....	12
5.2	Operation cost .....	13
5.3	Maintenance cost .....	13
5.4	End of life cost or revenue .....	13
6	Basic concept of life cycle assessment (LCA) for ductile iron pipe systems .....	14
6.1	Definition of CO <sub>2</sub> emissions impact .....	14
6.2	Calculation method of CO <sub>2</sub> emissions .....	14
7	Breakdown of CO <sub>2</sub> emissions .....	15
7.1	CO <sub>2</sub> emissions at the acquisition stage .....	15
7.2	CO <sub>2</sub> emissions at the operation stage .....	15
7.3	CO <sub>2</sub> emissions at the maintenance stage .....	16
7.4	CO <sub>2</sub> emissions at end of life stage .....	16
8	Key drivers for LCC and LCA evaluation .....	17
8.1	General .....	17
8.2	Reference service life (RSL) .....	17
8.3	Functional unit (FU) .....	18
8.4	Water leaks volume .....	18
8.5	Failure rate .....	18
9	Quality of data .....	18
Annex A (informative) Pumping cost and CO <sub>2</sub> emissions with pump operation .....		20
A.1	Pumping cost .....	20
A.2	Daily pumping energy .....	20
A.3	Total head loss .....	21
A.4	CO <sub>2</sub> emissions with pump operation .....	22
Annex B (informative) Scenarios of LCC and CO <sub>2</sub> emissions with different DI pipelines .....		23
B.1	Scenarios of LCC .....	23

<b>B.2</b>	<b>Scenarios of CO2 emissions .....</b>	<b>24</b>
	<b>Annex C (informative) Water leaks and failure rate of ductile iron pipelines .....</b>	<b>25</b>
<b>C.1</b>	<b>water leaks evaluation .....</b>	<b>25</b>
<b>C.2</b>	<b>Examples of failure rates .....</b>	<b>25</b>
<b>C.2.1</b>	<b>General .....</b>	<b>25</b>
<b>C.2.2</b>	<b>Example in France .....</b>	<b>26</b>
<b>C.2.3</b>	<b>Example in Germany .....</b>	<b>26</b>
<b>C.2.4</b>	<b>Example in Spain .....</b>	<b>27</b>
	<b>Annex D (informative) Circular economy, LCC and CO2 emissions .....</b>	<b>28</b>
<b>D.1</b>	<b>General .....</b>	<b>28</b>
<b>D.2</b>	<b>Conservation of mechanical characteristics in time .....</b>	<b>28</b>
<b>D.3</b>	<b>Recyclability .....</b>	<b>28</b>
<b>D.4</b>	<b>Worldwide scrap collecting .....</b>	<b>28</b>
<b>D.5</b>	<b>Optimum hydraulic conveyance capacity .....</b>	<b>29</b>
<b>D.6</b>	<b>Optimum pipe wall thickness .....</b>	<b>29</b>
<b>D.7</b>	<b>Preservation of soil .....</b>	<b>29</b>
	<b>Bibliography .....</b>	<b>30</b>
