## Soil quality - Framework for detailed recording and monitoring of changes in dynamic soil properties

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Principle .....	1
5	Methodology .....	3
5.1	Obtaining data .....	3
5.1.1	General .....	3
5.1.2	Level 0 -- Metadata .....	3
5.1.3	Level 1 -- Soil formation processes and horizon number .....	3
5.1.4	Level 2 -- Soil structure and bulk density .....	4
5.1.5	Level 3 -- Organic carbon .....	6
5.1.6	Level 4 -- pH and electrical conductivity .....	6
5.1.7	Level 5 -- Soil and landscape contextual data .....	6
5.2	Generating a soil fingerprint code .....	7
5.2.1	General .....	7
5.2.2	Populating soil fingerprint code levels .....	7
6	Reporting .....	12
Annex A (informative) List of recommended codes with descriptions .....		13
Annex B (informative) Concordance table of soil description system coding for soil structure types .....		20
Annex C (informative) Printable field observation templates for recording field observations at the study site .....		21
Annex D (informative) Printable field reference sheets for use at the study site .....		24
Annex E (informative) Example of the application of the framework .....		30
Bibliography .....		32
