## Treatment of water of swimming pools and baths - Part 3: Combinations of process with ozonization and chlorination

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	7
4	Principles of the process combinations .....	7
4.1	General .....	7
4.2	Flocculation - Filtration - Ozonation - Sorption filtration - Chlorination .....	8
4.3	Flocculation - Ozonation - Multi-layer filtration with sorption - Chlorination .....	8
5	Process stages .....	9
5.1	Adjusting the acid neutralizing capacity .....	9
5.1.1	General .....	9
5.1.2	Reagents for adjusting the acid neutralizing capacity .....	9
5.1.3	Values for the acid neutralizing capacity of the raw water .....	9
5.1.4	Checking the acid neutralizing capacity .....	10
5.2	pH value adjustment .....	10
5.3	Flocculation .....	10
5.3.1	General .....	10
5.3.2	Flocculants .....	13
5.3.3	Minimum quantity of flocculant to be added .....	14
5.3.4	Checking the flocculant dosage .....	14
5.4	Ozonation .....	14
5.4.1	General .....	14
5.4.2	Ozone mass concentration .....	15
5.4.3	Ozone dosage and ozone reaction time .....	15
5.4.4	Checking the ozone generation system .....	16
5.5	Flocculation filtration in the process combination Flocculation - Filtration - Ozonation - Sorption filtration - Chlorination .....	16
5.5.1	General .....	16
5.5.3	Checking the filtration .....	21
5.6	Sorption filtration in the process combination Flocculation - Filtration - Ozonation - Sorption filtration - Chlorination .....	21
5.6.1	General .....	21
5.6.2	Particle size ranges, filter bed heights and filtration rates .....	22
5.6.3	Backwashing of sorption filters .....	22
5.6.4	Checking the filtration .....	24
5.7	Multi-layer filtration in the process combination Flocculation - Ozonation - Multi-layer filtration with sorption effect - Chlorination .....	24
5.7.1	General .....	24
5.7.2	Filter bed heights, particle size ranges and filtration rates .....	24
5.7.3	Backwashing multi-layer filters with sorption effect .....	25
5.7.4	Checking the filtration .....	28
5.8	Checking the flocculation filtration and sorption filtration .....	28
5.9	Chlorination .....	30
5.9.1	General .....	30
5.9.2	Chlorine concentration .....	30

<b>6</b>	<b>Load capacity factor k .....</b>	<b>30</b>
	<b>Annex A (informative) Simplified representation of process combinations (examples) .....</b>	<b>31</b>
	<b>Bibliography .....</b>	<b>34</b>

## **Figures**

<b>Figure 1 — Correlation between pipe internal diameter and flow rate.....</b>	<b>13</b>
<b>Figure A.1 — Simplified diagram of the process combination flocculation - filtration - ozonation - sorption filtration - chlorination .....</b>	<b>31</b>
<b>Figure A.2 — Simplified diagram of the process combination flocculation - ozonation - multi-layer filtration with sorption effect - chlorination (pressurized ozone reaction vessel) .....</b>	<b>32</b>
<b>Figure A.3 — Simplified diagram of the process combination flocculation - ozonation - multi-layer filtration with sorption effect - chlorination (ozone reaction vessel at atmospheric pressure) .....</b>	<b>33</b>

## **Tables**

<b>Table 1 — Particle size ranges, filter bed heights and filtration rates for single-layer filters using silica sand.....</b>	<b>20</b>
<b>Table 2 — Particle size range combinations for multi-layer filters.....</b>	<b>20</b>
<b>Table 3 — Filter bed heights and filtration rates for multi-layer filters .....</b>	<b>21</b>
<b>Table 4 — Particle size ranges, filter bed heights and filtration rates for sorption filters .....</b>	<b>22</b>
<b>Table 5 — Particle size ranges, filter bed heights and filtration rates of multi-layer filters with sorption effect.....</b>	<b>25</b>
<b>Table 6 — Sample Backwashing programme for multi-layer filters with sorption effect as listed in Table 5.....</b>	<b>27</b>
<b>Table 7 — Specifications for checking filtration.....</b>	<b>28</b>
