ISO 24575:2023-05 (E)

General principles and guidelines for cost analysis in planning of decentralized wastewater treatment and/or reuse

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms,definitions,symbolsandabbreviatedterms 2
3.1 Terms and definitions 2
3.2 Symbols and abbreviated terms 2

4 Descriptionofdifferentdegreesofdistributioninplanninganddesign 3

5 Generalized elements of wastewater treatment and reuse systems 4
5.1 General 4
5.2 Collection 4
5.3 Conveyance 4
5.4 Treatment 5
5.5 Effluent reuse management 7

6 Costitemstobeconsideredineconomiclifecycleanalysiscalculations 7
6.1 General 7
6.2 Investment cost (CI) or CAPEX items 7
6.2.1 General 7
6.2.2 Sewer collection piping, CI,A 8
6.2.3 Pumping stations, CI,B 8
6.2.4 The treatment plant, CI,C 8
6.2.5 Effluent distribution piping, CI,D 9
6.2.6 Effluent pumping stations, CI,E 9
6.2.7 Treated water reservoirs, CI,F 9
6.3 Operating cost (CO) OPEX items 9
6.3.1 General 9
6.3.2 Electricity, CO,A 10
6.3.3 Labour, CO,B 10
6.3.4 Chemicals, CO,C 10
6.3.5 Sludge disposal, CO,D 11
6.3.6 Services, CO,E 11
6.3.7 Others, CO,F 11
6.4 Maintenance cost items (CM) 11
6.5 Income or revenue: negative cost items (CN) 12
6.5.1 General 12
6.5.2 Income from selling treated water for reuse, Iw 12
6.5.3 Income from biogas and its products, IG 12
6.5.4 Income from selling recovered products, IS 13
6.5.5 Other income, IO 13

7 Cost calculations, factoring and results integration 14
7.1 General 14
7.2 Conversion of all costs to present value 14
7.3 Normalization of all costs per unit 15

8 Reporting on results of economic life cycle analysis calculations 15

Annex A (informative) Cost calculation example 17

Annex B (informative) Correlations for CAPEX and OPEX of different process units in a treatment plant for reuse 19

Annex C (informative) Summary of treatment process units along with their associated cost items 20
